FAO Scott Lightfoot

Dear Scott,

Re: Stockport College, Phase 1 – New Build Workshops

We wish to express our gratitude for the manner in which you completed the structural and secondary steelwork package associated with the above project. The speed at which you designed, procured and erected both the 350t Block A and 20t Block B structures, whilst at all time maintaining our safety and quality standards, is of great credit to Reynolds and Litchfield.

Furthermore, we would also like to thank you for the degree of professionalism employed in the management and execution of the substantial number of client variations to the Block A building. Not only were these works implemented at very short notice, thereby helping maintain a strict programme, but furthermore, the costs associated therewith were valued in a very reasonable manner which is unfortunately seldom employed by many of the industry's sub-contractors. We appreciate that the introduction of isolated beams etc. are insignificant in comparison to a major structure however, all work undertaken, regardless of size of value was done so to our complete satisfaction.

We would thank you once again and look forward to working with Reynolds and Litchfield again in the near future.

Yours sincerely

Terry Hearfield
Project Surveyor
